Department of B.C.A.

Karmaveer Bhaurao Patil College, Urun-Islampur

Resource Person

Mr. Rajendra Salunkhe

Lead Software Engineer, Virtusha, Pune

The demand for skilled mobile application developers is rapidly increasing as organizations move toward digital transformation. Flutter, Google's cross-platform mobile development framework, has emerged as one of the most in-demand technologies in the IT industry.

With the objective of enhancing student employability, the Department of B.C.A. organized a Training and Placement activity on Mobile Application Development using Flutter Technology on Monday, 8th December 2025. The activity was part of the department's continuous efforts to strengthen students' practical knowledge and understanding of modern and open-source technologies.

The training session was conducted by Mr. Rajendra Salunkhe, Lead Software Engineer at Virtusha, Pune. He holds a Master of Computer Applications (M.C.A.) degree and has gained international exposure by working for one year in Canada with the same organization. His expertise lies in mobile application development, and he has worked on several successful industry projects.

The program commenced with a warm welcome and introduction of the resource person by Ms. P. A. Kupade Madam on behalf of the department and the institution. During the session, the resource person explained the concepts, architecture, advantages, and practical applications of Flutter. He emphasized Flutter's capability to develop natively compiled applications for Android, iOS, web, desktop, and embedded devices using a single codebase.

The session witnessed active participation from students, resulting in an interactive learning environment. A discussion session followed, during which faculty members and the resource person shared insights on the importance of mobile application development skills in academic learning as well as industry careers.

The event was anchored by Ms. Diksha Bhandare, a student of B.C.A. III. The program concluded with a vote of thanks delivered by Mr. P. M. More Sir, Head of the Department, who expressed gratitude to the resource person, faculty members, and students for their cooperation and active participation.

OBJECTIVES

- To introduce students to Flutter and the Dart programming language.
- To develop skills required for creating Android, iOS, and web applications.
- To enable students to build real-time mobile applications.
- To improve student employability through hands-on workshops.
- To prepare students for technical interviews and industry expectations.

OUTCOMES

The training resulted in the following student achievements:

- Improved programming skills in Dart and Flutter framework
- Ability to build complete mobile applications
- Enhanced understanding of UI/UX principles
- Experience with real-time data handling using APIs
- Confidence in solving technical problems
- Completion of capstone projects useful for portfolios

CONCLUSION

The Training and Placement activities on **“Mobile Application Development using Flutter Technology”** played a crucial role in enhancing students' technical and employability skills. The combination of theory, hands-on practice, mock interviews, and project development helped students become job-ready in a rapidly growing field. The initiative successfully bridged the gap between academic learning and industry requirements.
