To,

The Principal,
All Concerned Affiliated Colleges/Institutions
Shivaji University, Kolhapur

The Head/Co-ordinator/Director
All Concerned Department (Science)
Shivaji University, Kolhapur.

Subject: Regarding syllabi of M.Sc. Part-II (Sem. III & IV) as per NEP-2020 (1.0) degree programme under the Faculty of Science and Technology.

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the university authorities have accepted and granted approval to the revised syllabi, nature of question paper and equivalence of M.Sc. Part-II (Sem. III & IV) as per NEP-2020 (1.0) degree programme under the Faculty of Science and Technology.

M.Sc.-II (Sem. III & IV) as per NEP-2020 (1.0)			
1.	M.A/M.Sc Geography	2.	M.Sc. Zoology

This syllabus, nature of question and equivalence shall be implemented from the academic year 2024-2025 onwards. A soft copy containing the syllabus is attached herewith and it is also available on university website www.unishivaji.ac.in, NEP-2020 (Online Syllabus).

The question papers on the pre-revised syllabi of above-mentioned course will be set for the examinations to be held in October /November 2024 & March/April 2025. These chances are available for repeater students, if any.

You are, therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

Dr. S. M. Kubal
Dy Registrar

1	The Dean, Faculty of Science & Technology	4	P.G Admission / Eligibility Section
2	The Chairman, Respective Board of Studies	5	Computer Centre/ Eligibility Section
3	B.Sc. Exam/ Appointment Section	6	Affiliation Section (U.G.) (P.G.)

SHIVAJI UNIVERSITY, KOLHAPUR

Established: 1962

A⁺⁺ Accredited by NAAC (2021) with CGPA 3.52

***Structure and Syllabus in Accordance with
National Education Policy - 2020***
(with Multiple Entry and Multiple Exit Option)

for the degree of
M.A./M.Sc. in Geography
(with PG Diploma in Geography as an exit option)

**Department of Geography
Faculty of Science and Technology**

Implemented From...

Part I (Level 6.0): Academic Year 2023-24 onwards
(i.e., from June 2023)

Part II (Level 6.5): Academic Year 2024-25 onwards
(i.e., from June 2024)

1. Preamble:

The M.A./M.Sc. Programme in Geography is offered by the department of geography under the faculty of science and technology, Shivaji University, Kolhapur. It teaches students for post graduate degree in Geography from both social science and science stream. This programme is financially supported by the Govt. of Maharashtra. The department also receives research and infrastructure grants under various schemes of the Govt. of India. Utilizing the financial assistance received from various stakeholders the department has improved its infrastructure to provide better learning environment for the students.

It is a premier geography department in India, having a holistic academic curriculum in the discipline of Geography. The department also offers opportunities for enrolled students to participate for some discipline specific short term certificate and/or value added add on courses for upgrading their employability skills. Currently, the department is equipped with smart classroom, overhead LCD projection system, digital board, computer laboratory, Wi-Fi, state of art GIS laboratory with advanced and up-to-date mapping software, state of art instruments, a separate departmental library and meeting hall to provide students an effective learning environment.

Students enrolling for the programme are expected to have basic knowledge and understanding in Geography. This master degree course in Geography will focus to enhance students' ability to apply their specialized knowledge in the geographical domain to increase the employability skills and competencies to serve the job requirements in the society. This programme will inspire students to develop the abilities among them to offer services in the entrepreneurial environment. To cultivate the interest among students to conduct research activities in the discipline of Geography is another primary objective of the programme.

- 2. Duration:** The M.A./M.Sc. programme duration is of two years comprising of four semesters. Each semester spanning for 6 months of minimum 120 working days (minimum 90 teaching days).

3. Eligibility for Admission:

For Level 6.0 (Part I):

Completed B.A./B.Sc. with Geography as principal / major subject from a recognized University/ Institution.

For Level 6.5 (Part II):

- (i) Completed Post Graduate Diploma in Geography from a recognized University/ Institution. or
- (ii) Completed Bachelor's Degree (Honours / Research) in Geography from a recognized University/ Institution.

4. Medium of Instruction: English

5. Programme Structure:

Structure in Accordance with National Education Policy – 2020 with Multiple Entry and Multiple Exit Options M.A./M.Sc. (Geography) Part – I (Level 6.0)

Course Type	Course No. / Code	Teaching Scheme			Examination Scheme

Research Project	RP	02	04/06	10

6. Programme Outcomes (POs):

1. Students will have comprehensive knowledge in the discipline of Geography.
2. They will have ability of making comprehensive analysis, interpret spatial problems, and suggest proper solutions by using theoretical, methodological, and instrumental knowledge of Geography.
3. Good employability skills as per current need of the society to compete in the competitive world.
4. They will have good understanding about proper utilization of natural resources through geographical knowledge.
5. Aware about the regional and national environmental issues, recent trends, and technological advancements in the discipline of Geography.
6. Develop research interest to solve critical and emerging societal issues related to geography and the surrounding environment.

7. Course Codes:

Sr. No.	Course No.	Course Title	Credits	Course Codes
Semester - I				
1	MMT-101	Geomorphology	4	MSU0325MML919G1
2	MMT-102	Principles of Climatology	4	MSU0325MML919G2
3	MMT-103	Economic Geography	4	MSU0325MML919G3
4	MMPR-104	Computer Applications in Geography	2	MSU0325MMP919G1
5	MET-105	Population Geography and Human Resource Development	4	MSU0325MEL919G1
	MET-106	Settlement Geography	4	MSU0325MEL919G2

	MEPR-407	Data Representation Methods – Human Geography	4	MSU0325MEP919J2
5	RP-408	Research Project – II (Dissertation)	6	MSU0325RPP919J1

8. Syllabus:

M.A./M.Sc. Geography (Part I) (Level – 6.0) (Semester I) (NEP – 2020) (Introduced from Academic 2023-24)

Title of Course: Geomorphology

Course Code: MMT-101 (MSU0325MML919G1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the nature and scope of geomorphology and establish the relationship between the tectonism and geomorphology with the knowledge of interior of the Earth.
2. Look into the evolution of continents and ocean basins with continental drift theory.
3. Know the endogenetic and exogenetic forces controlling landform development with special reference to the denudation processes.
4. Verify the impact of dynamic agencies on denudation and their work.
5. Understand the cycle of erosion with different views with special reference to hill slope development.
6. See the application of geomorphology in the view of anthropogenic and environmental geomorphology.

Unit-1: Fundamentals

15 Lectures

Meaning nature and scope of geomorphology, Interior of the Earth, Earthquakes, Volcanoes and associated features, folding and faulting.

Unit-2: Concepts in Geomorphology

15 Lectures

Evolution of Continents and ocean basins, Continental Drift theory of Wegener, Theory of Plate Tectonics. Geosynclinals theory of Kober, Theory of Isostasy

Unit-3: Factors controlling landform development

20 Lectures

Weathering, Erosion and Mass wasting. Landforms of Fluvial, Glacial, Coastal, Aeolian and Karst topography, Geographical Cycle of Davis, Hill Slope development, views of W.M. Davis, Walther Penck, Allen Wood and L.C. King.

Unit-4: Applied Geomorphology

10 Lectures

Anthropogenic Geomorphology, Environmental Geomorphology and recent trends in Geomorphology.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester I)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Principles of Climatology

Course Code: MMT-102 (MSU0325MML919G2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Distinguish the weather and climate with an understanding of structure and composition of Atmosphere;
2. Understand the variations of weather systems in terms of Stability and Instability of atmosphere;
3. Enable the students to understand the vertical and horizontal distribution of atmospheric air;
4. Get complete information about Atmospheric Disturbances in terms of cyclones and anti-cyclones;
5. Understand the regional and seasonal variations of weather systems in India;
6. Know the significance of synoptic Climatology in pollution studies and navigation

Unit - 1:

15 Lectures

Introduction to Climatology: Significance of Climatology, Modern Climatological studies, Origin and evolution of the earth's atmosphere, Structure and Composition of Atmosphere, Insolation, Heat transfer- Radiation, Convection and conduction, Terrestrial heat balance.

Unit - 2:

15 Lectures

Moisture in the Atmosphere: Changes of state, Processes that cause changes of state, Humidity, Humidity measurements, Adiabatic temperature change in atmosphere, Stability and Instability of atmosphere, Condensation- Clouds and fogs, Precipitation - precipitation processes, types and forms.

Unit - 3:

15 Lectures

Motion in the Atmosphere: Air Pressure, Pressure measurement and distribution, Factors affecting wind, Pressure belts, Classification of Wind, Planetary winds, Monsoon and Local winds, Air Masses, Classification and modifications of Air Masses.

Unit - 4:

15 Lectures

Atmospheric Disturbances: Fronts: Characteristics and types, Tropical Cyclones, Anticyclones, Thunderstorms, Tornadoes, Hurricanes, Water spouts; Weather forecasting and application of meteorological satellites with special reference to India. Application of Synoptic Climatology in pollution studies and navigation.

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the concepts and basis of economic processes
2. Get acquainted with theories and models in economic geography
3. Get comprehensive knowledge of World energy resources, situation and distribution
4. Know about the Nature, scope and Principles of Industrial Geography
5. Understand transport and Trade policies of country
6. Get detail knowledge of economic power determinants of country and able to analyze the economic development of country.

Unit-1: Basics of Economic Geography

15 Lectures

Nature and scope; Approaches to the study of economic geography; Basis of economic processes: Production, exchange & consumption, Classification and characteristics of economic activities. Demand, supply, elasticity, Determinants of national income, investment, inflation, unemployment, risk and uncertainty, long-term investment planning, Special Economic Zones.

Unit-2: Energy Resources

10 Lectures

Concept of resources, Classification of resources, Renewable & Non-renewable energy resources, World energy situation and distribution; Sources of Energy: Coal, Oil, Natural gas and Nuclear energy, OPEC-energy crisis.

Unit- 3: Industrial Geography

15 Lectures

Nature and scope of Industrial Geography, Factors of Industrial Location, Principles of Industrial Location: – Profit maximization, Least cost location- A. Weber & A. Losch- industrial location theories, Rostow's model, Industrial regionalization; World industries: locational patterns and problems; New industrial policies of India.

Unit-4: Transportation & Trade

20 Lectures

Modes of transportation, Road Network analysis, Accessibility, connectivity and Modern geospatial applications in road network, Interregional and Intraregional: Ullman's triad- Complementarily- Intervening Opportunity- Transferability, Trade Policy; Export processing zones, International Trade Characteristics, patterns of world trade, Regional Trade blocks EEC, EFTA, & WTO.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester I)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Computer Applications in Geography

Course Code: MMPR-104 (MSU0325MMP919G1)

Total Credits: 02

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Learn the representation of geographic data using various computational methods;
2. Develop writing, editing, and presentation skill for representation of geographical information;
3. Compute statistical parameters with the help of computer;
4. Prepare and design maps and graphs with the help of computer software;
5. Apply computational techniques relevant in the discipline of Geography;
6. Know about sources and uses of online educational resources and e-learning methods;

Unit-1: Computer hardware and software; Writing / formatting of texts, graphs, tables, and references using MS word; Preparation of power point presentation using MS power point; Use of MS excel; Presentation and analysis of geographic data using graphs, charts, maps with the help of computer.

35 Hrs.

Practical Exercise(s):

- 1: Demonstration of computer hardware, useful software and their uses.
- 2: Writing / formatting of text paragraphs.
- 3: Inserting, creating, and editing of text box, smart art, pictures and graphs.
- 4: Construction and editing of tables.
- 5: Reference writing styles using MS word with examples.
- 6: Preparation of MS power point presentation.
- 7: Data handling and editing using MS Excel.
- 8-12: Presentation and analysis of geographic data using MS Excel – preparation of graphs/charts (bar graph, line graph, pie diagram, scatter diagram and trend line).
- 13: Map editing and labeling.

Unit-2: Computer, email and password security; Online data storage and management using online storage facilities; Preparation and editing of google forms; Browsing of online educational resources; E-learning.

25 Hrs.

Practical Exercise(s):

- 14: Computer, email and password security.
- 15: Storing and retrieving of data/ documents using online data storage facilities (Google Drive, OneDrive etc.).
- 16: Preparation of online questionnaire / online survey through google forms.
- 17: Identification, browsing, and storing of online educational resources.
- 18: Comprehensive browsing and listing of useful geographical websites.
- 19: E-learning objectives, methods, and listing of open online e-learning websites.
- 20-21: E-learning through e-content and open online courses: e-PG Pathshala, digital library, MOOCS – SWAYAM.

(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Population Geography and Human Resource Development

Course Code: MET-105 (MSU0325MEL919G1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Infer factors influencing population distribution and growth;
2. Compute and explore fertility, mortality and migration.
3. Analyse the population-resource regions and discover problems arising due to over and under population.
4. Understand and create awareness about provincial aspects of gender equity, status of women, social well-being and quality of life.
5. Acquire skill to describe regional patterns of population composition.
6. Obtain expertise to compute Human Development Index for micro, meso and macro regions.

Unit-1: Introduction

20 Lectures

Meaning, nature and scope of Population Geography; Population Geography and Demography; Sources of population data – Census, Sample surveys and vital statistics; Population dynamics: Population distribution and growth - measures, patterns and determinants with reference to World, India and States; Fertility, Mortality - Concepts; Indices, Trends and Determinants -India; Migration- Types, Determinants and consequences; Measures and methods of estimations.

Unit-2: Population Theories

10 Lectures

Theories of population: Malthus, Marx, Sadler, Demographic Transition Model; Migration theories: Ravenstein and Everette Lee; Epidemiological Transition.

Unit-3: Characteristics of population resource

10 Lectures

Characteristics of population composition and change: India and States – age, sex, rural-urban, occupational structure, and educational levels; Over, under & optimum population; Population resource regions of the world.

Unit-4: Human Development and Population Policies

20 Lectures

Human development Index: Concepts, Pillars, Approaches; Human development Patterns World & India, Gender Equity, Social well-being and quality of life; Status of women – social, economic and health; Population Policies in developed and developing nations, National Population Policy of India.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester I)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Settlement Geography

Course Code: MET-106 (MSU0325MEL919G2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know the fundamentals of settlement geography
2. Understand the approaches to rural settlement geography; rural services; hierarchy; morphology etc.
3. Know the concept and processes of urban settlement studies; urban problem & their planning; concept smart cities, urban agriculture, etc.
4. Understand the theories and models of settlement geography to understand the structure of settlements.

Unit-1: Fundamentals of Settlement Geography

10 Lectures

Settlement Geography – The nature, scope and significance; origin and growth of rural and urban settlements; Definition and types of settlements; Site, situation and locational factors of settlements. Spacing, dispersion and localization. Characteristics of rural settlements.

Unit-2: Geography of Rural Settlements

15 Lectures

Introduction to rural settlement geography, Approaches to rural settlement geography; socio-economic structure of rural settlements; Rural-service centers-nature, hierarchy, service area and interaction; Indian villages-evolution and multiplicity, regional characteristics, Rural planning and integrated development in India.

Unit-3: Geography of Urban Settlements

20 Lectures

Introduction to urban settlement geography, Concept and processes of urbanization, suburbanization, Rural-urban fringe, urban sprawl, Functional classification of urban settlements; Conurbation, Size and spacing of cities- rank-size rule, law of primate city, urban hierarchies; Urban problems, Urban planning and challenges, Concept of smart city, Garden city movement, Urban agriculture.

Unit-4: Theories and Models in Settlement Geography

15 Lectures

Multiple nuclei model by Harris and Ullman; Central place theory by W. Christaller; Concentric zone model by E. W. Burges; Sector model by Homer and Hoyt. Urban poverty, Slums: Characteristics, Planning. Master plans of towns.

(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Geography of Health and Nutrition

Course Code: MET-107 (MSU0325MEL919G3)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Acquaint the students with the role of geographical factors, viz., physical, demographic, social and economic factors, influencing the spatial distribution of diseases;
2. Decipher the causes of the changing disease pattern;
3. Understand the WHO classification of diseases;
4. Get to know the food groups and food pyramid.
5. Highlight the relation of health with nutrition, environmental degradation and urbanization;
6. Be introduced with the classification and types of nutrients and their role in human body; and
7. Make the students abreast of existing health-care facilities, so as to train them with better health care planning for the country.

Unit-1: Introduction to Geography of Health

10 Lectures

Nature, scope and significance; Geographical factors affecting human health with special reference to physical, social, economic, environmental and diseases arising from them.

Unit-2: Classification of Diseases

15 Lectures

Classification of diseases: genetic, communicable and non-communicable; occupational and nutritional deficiency diseases; WHO classification of diseases, Pattern of World distribution of major diseases; Epidemiological transition theory.

Unit-3: Human Ecology of Diseases and Human Nutrition

15 Lectures

Ecology, etiology and transmission of major diseases: cholera, malaria, tuberculosis, hepatitis, leprosy, cardiovascular, cancer, COVID-19, AIDS and STDS; Diffusion of diseases and its causes; Food groups: balanced diet, food pyramid; Classification and types of nutrients; macro and micro nutrients; Nutrients: role of nutrients in human body; nutrient deficiencies and requirements for Indians, Deficiency disorders and problems of micro and meso nutrients, mal-nutrition in India.

Unit-4: Health Care

20 Lectures

Health Care - International level, with special reference to WHO, UNICEF and National level, with special reference to Government and NGOs; Availability, accessibility and utilization of health care services; Primary health care; Inequalities in health care services in India; family welfare, immunization, national disease eradication, and Health for All programmes, Health care response to COVID-19.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester I)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Research Methodology in Geography

Course Code: RM-108 (MSU0325RMP919G)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Identify the objectives and significance of research in geography;
2. Prepare schedule and questionnaire in geography;
3. Collect data of physical and human elements;
4. Tabulate data, formulate research design and represent data by using most appropriate methods;
5. Effective writing, maintaining research ethics and academic integrity;
6. Write abstracts, thesis, project report and research papers

Unit-I: Research Methodology: An Introduction

30 Hrs.

Exercise(s):

- 1-3: Definition, meaning, objectives and significance of research, approaches in research.
- 4: Defining research problem
- 5: Meaning and Need of research design
- 6-7: Sampling methods and sampling size
- 8: Concept of hypothesis

Unit-2: Data collection and Preparation

30 Hrs.

Exercise(s):

- 9-11: Data types, Data sources and data collection methods
- 12-13: Preparation of schedule & questionnaire
- 14-15: Concept of qualitative and quantitative analysis of data
- 16-17: Presentation and interpretation of data

Unit-3: Effective Research Writing

30 Hrs.

Exercise(s):

- 18-19: Literature review; writing styles and manuals
- 20-22: Writing of abstracts, project report and research papers
- 23-24: Referencing system, references, webliography, bibliography
- 25-26: Footnotes, glossary, appendices

Unit-4: Recent Trends in Geographical Research and Publication

30 Hrs.

Exercise(s):

- 27-28: Recent trends in Physical and Human Geographical research
- 29-30: Applications of Computer, Remote Sensing and GIS in Geographical research
- 31-32: Publication metrics: h-index, g-index, i10-index, altimetric, citation and measuring impact of research
- 33-34: Research publishers and Open access publishing: Journal finders Elsevier, Springer
- 35-36: Research ethics in publication, Predatory publishers & journals

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Advanced Cartography and Surveying

Course Code: MMT-201 (MSU0325MML919H1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand basic principles of cartography and surveying
2. Gain understandings of various cartographic methods and techniques
3. Acquaint with the skills of digital cartography
4. Identify sources and types of errors occurs during surveying
5. Get familiar with the basic aspects of linear, vertical and angular measurements of surveying.

Unit - 1: Fundamentals of Cartography

15 Lectures

Definition, nature and scope of cartography, Basics of geodesy, Scale- definition, types & importance, Concept of datum- vertical and horizontal, Co-ordinate systems- geographical and projected, Map- definition, types and significance, Cartographic methods and techniques for representation of data.

Unit - 2: Digital Cartography

20 Lectures

Introduction to digital cartography, Manual cartography vs. Digital cartography, Cartographic data and its sources, Cartographic database, Design principles of cartography, Map design, Symbolization, Visualization and generalization, Digital cartography- hardware and software, Advantages and disadvantages, Applications of digital cartography.

Unit - 3: Fundamentals of Surveying

10 Lectures

Definition, classification and principles of surveying, Nature of surveying work- field work and office work, Sources and types of errors, Precision and accuracy, Units of measurements.

Unit - 4: Surveying Measurements

15 Lectures

Linear measurement-types of ranging, Methods-approximate, direct, optical and electronic, Errors and applications, Angular measurement-types of measured angles, Compass, Meridian, Bearings and azimuths, Errors, Corrections and precautions, Vertical measurement-types and methods of leveling, Contouring- definition, characteristics, methods and interpolation.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Climate Change and Disaster Management

Course Code: MMT-202 (MSU0325MML919H2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Recognize the importance of climate on human life;
2. Identify and categorize climate types and climatic regions of the world;
3. Get comprehensive knowledge about causes and impacts of atmospheric pollution, GHGs emission, ozone layer depletion, acid rain and el-nino;
4. Know about the history, recent trends, impacts and dynamics of climate change on earth;
5. Assess future risks of climate change and the adaptation and mitigation options;
6. Understand causes, consequences and vulnerabilities of various natural and man-made disasters;
7. Plan for prevention, preparation and mitigation of disasters;

Unit - 1: Global Climate Change Issues and Impacts

25 Lectures

History and relevance of climate change studies; Role and impact of climate on human being, soils and agriculture; Global climatic regions; Climatic classification of Koppen and Thornthwaite; World pattern of temperature and precipitation; Causes, impacts and society's response to change in air quality and atmospheric pollution; Causes and impacts of greenhouse gas (GHGs) emission, ozone layer depletion, acid rain; El-nino and southern oscillation (ENSO).

Unit - 2: Paleoclimatology and Climate Change Observations

13 Lectures

Paleoclimatology - climate dynamics and water balance with reference to evolution of the earth systems; General overview of the climate change – observed changes and its impacts; Recent trends of climate change and its impact on natural and human subsystems; Significant climate anomalies and extreme weather events; Future climate changes – risks and impacts; Adaptation and mitigation options of climate change.

Unit - 3: Natural Hazards and Disasters

12 Lectures

Meaning and types of hazards and disasters; Causes and impacts of natural and man-made disasters (earthquake, volcanic eruption, landslides, avalanches, cyclones, floods, droughts, tsunamis, forest fire, nuclear, biological and chemical disasters); Disaster exposure and vulnerabilities in Maharashtra, India and the world.

Unit - 4: Disaster Management

10 Lectures

Prevention and mitigation of disasters; Disaster preparedness and response plan; Disaster management cycle; Administration and multiple stakeholders' response to disaster management; Disaster management acts and regulations; Use of modern technologies for disaster management.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Advanced Surveying

Course Code: MMPR-203 (MSU0325MMP919H1)

Total Credits: 02

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Familiar with various advance surveying methodologies
2. Develop practical skills as well as organisational and interpersonal abilities
3. Perform survey using advanced surveying instruments like theodolite, total station, DGPS and drone
4. Create a map based on a survey

Practical Exercise(s):

Unit-I:

30 Hrs.

Introduction to Levelling,

1. Concept and Mechanism.
2. Types of levelling instrument.
3. Dumpy level- parts of instrument- temporary and permanent adjustment.
4. Measurement, survey data collection and processing.
5. Preparation of contour map.

Introduction to Theodolite

6. Concept and mechanism.
7. Types of theodolite.
8. Components of theodolite, temporary and permanent adjustment.
9. Survey data collection, processing and mapping.

Unit-II:

30 Hrs.

Introduction to Total station

10. Concept and mechanism.
11. Components of total station, adjustment and setting of instrument.
12. Survey data collection, processing and mapping.

Introduction to Differential GPS (DGPS)

13. Concept and mechanism.
14. Components of DGPS, adjustment and setting of instrument.
15. Survey data collection, processing and mapping.

Introduction to Drone surveying

16. Concept and mechanism.
17. Field planning, data collection, processing and mapping.

(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Fundamentals and Applications of GIS and GPS

Course Code: MET-204 (MSU0325MEL919H1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the basic concepts of Geographical Information System and GPS.
2. Know various applications of GIS and GPS in various fields.
3. Familiar with modern techniques of geography.
4. Apply these skills in professional careers.

Unit 1: Introduction to GIS

20 Lectures

Definition of GIS, History and development of GIS, Components and Future of GIS, Types of Geographic data; Raster and Vector data model; Spatial data input: Digitization and Conversion; Point, line and polygon; Concept of Arc, node and vertices; Digitization errors; Topology and topological relationship.

Unit 2: GIS Analysis

12 Lectures

Spatial analysis: Overlay and Buffer Analysis, Interpolation techniques in GIS; Network analysis; Terrain analysis: DEM, DTM and TIN; Data quality issues; Database Management system (DBMS); Types of attribute data, Relational Model, Normalization and SQL.

Unit 3: Introduction to GPS

12 Lectures

Introduction to GPS; types of GPS System; Space, Control and User Segment; GPS satellite; Working principle of GPS; Source of GPS errors; Differential GPS; GNSS & GIS Integration, Applications of GPS.

Unit 4: Applications of Geospatial Technology

16 Lectures

Geospatial Technology in Urban and Regional planning, Water resource management, Soil resource Management, Agricultural Management, Forestry and Environment, Land use/ and Land cover mapping, Natural hazards assessment.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Fundamentals of Soil Geography

Course Code: MET-205 (MSU0325MEL919H2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the concepts and principles of soil formation.
2. Study the role of essential nutrient for plant growth and development.
3. Determine the physical and chemical properties of soils.
4. Enable the students to realize the Soil and environmental problems;
5. Know the significance of soil conservation and methods of Soil reclamation.

Unit-1:

15 Lectures

Introduction to soil geography: Concepts and definitions, Process of origin of soil, pedogenesis, soil profile and categories of soil taxonomy-major groups. Soil forming processes and factors, Weathering and soils, Soil as a medium for plant growth, Managing Soil Health: Concepts and Practices, Essential nutrient elements, Plant roots and soil relations. Soil fertility and soil productivity.

Unit-2:

15 Lectures

Physical properties of soil: Soil morphology, Soil texture, Soil Structure; Genesis and Types of structure, Soil consistence, Soil:- moisture, colour, porosity and permeability; Regulation of Air and Water in Soil; Management Practices to Improve Soil Health, Effects of tillage on structure and porosity.

Unit-3:

15 Lectures

Chemical properties of soil: Organic soils and Mineral soils, Chemical composition of soils, Ion exchange, Cation exchange, Determination of soil pH, Management of soil pH, Soil clays, humus, Soil organic matter, and NPK.

Unit-4:

15 Lectures

Soil and environmental problems: Classification of tropical soils, Soil erosion, Universal soil loss equation (USLE), Nature and management of saline and sodic soils. Trace metals, Soil Contamination, Micronutrients and Toxic Elements in soils: Iron, manganese, Copper and zinc. Conservation of soil, Methods of Soil reclamation.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Tourism Geography

Course Code: MET-206 (MSU0325MEL919H3)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the concepts and components in tourism geography
2. Know about importance of geography in tourism.
3. Know about pattern & tourism in the world and impact of globalization
4. Understand different elements of marketing in tourism
5. Understand tour and travel agency
6. Get detail knowledge about planning process in tourism
7. Analyse the growth and development of tourism in India.

Unit-1:

15 lectures

Concept of Tourism, nature, scope and importance of tourism. Definition of Traveller – Tourist - Excursionist –Tourism - Basic Components of Tourism - Attraction, Geographical approach in tourism. Multidisciplinary approach. Accommodation, Amenities, Accessibility and Awareness. Types and forms of tourism, Types of accommodation and transportation. Physical, socio cultural and economical impact of tourism.

Unit-2:

15 lectures

Geography: Meaning, features, branches, and relationship with tourism. Climatic regions of the world, latitude & longitude lines, time zones, international date line, Indian standard time. Importance of Geography in Tourism, Impacts of physiography, Climate and Weather on tourist destination. Geographical patterns of tourism and the tourism characteristics of selected world regions.

Unit-3:

15 lectures

Marketing of tourism, STP, Marketing Mix, Tourism Product. Meaning of tour and travel agency. Types of travel agency. Types of tour operator. Characteristics of tour and travel agency. History and development of tourism in world. Different Tourism Systems- Leiper's Geospatial Model, Mill-Morrison, Mathieson & Wall, Butler's Tourism Area Life Cycle (TALC) - Doxey's Index – Demonstration Effect – Crompton's Push and Pull Theory, Stanley Plog's Allo-centric and Psycho-centric Model of Destination Preferences, Tourism Area life cycle (TALC)

Unit-4:

15 lectures

Planning for tourism development. Tourism in India – resources for tourism in India. Growth and development of tourism in India. Problems of tourism in India. Tourism planning in India. Tourism development in Maharashtra.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Introduction to GIS Software and GPS

Course Code: MEPR-207 (MSU0325MEP919H1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Familiarize with QGIS software and tools.
2. Apply Comprehensive knowledge of GIS software and GPS for analysis of geographical data and to solve real world problems
3. Understand the role of GIS as decision support system and to develop various model for GIS spatial analysis.
4. Examine the various functions of GPS for surveying and mapping.
5. Develop practical skills in spatial data acquisition, management, and analysis.
6. Learn to create and visualize maps using GIS techniques.

Unit-1: Introduction to QGIS

30 Hrs.

Exercise 1: Interface of QGIS

Exercise 2: Working with Projections

Exercise 3: Online GIS Data Sources

Unit-2: Basics of QGIS

30 Hrs.

Exercise 4: Georeferencing: Toposheet & Image Registration

Exercise 5: Digitization of Map Data

Exercise 6: Working with WMS Data

Exercise 7: Working with Google Earth

Exercise 8: Making a Map Layout

Unit-3: Data Exploration

30 Hrs.

Exercise 9: Data query: Spatial and Attribute

Exercise 10: Animating Time Series Data

Exercise 11: Interpolating Point Data

Exercise 12: Travel Time Analysis with Traffic Movement

Exercise 13: Service Area Analysis using Open Route Service

Unit-4: Introduction to GPS instrument

30 Hrs.

Exercise 14: GPS instrument

Exercise 15: Basic functions

Exercise 16: GPS surveying: Setting of GPS coordinates, Waypoints demarcation, Area Calculation through GPS, Navigation by Mobile GPS application.

Exercise 17: Transfer of data in GIS software

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Soil and Water Analysis

Course Code: MEPR-208 (MSU0325MEP919H2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know about the soil sample collection during the soil survey/ field work.
2. Analyse the physical properties of soils.
3. Analyse the chemical properties of soils
4. Determine the physical and chemical properties of water samples.

Unit-1: Soil Survey

20 Hrs.

- Exercise 1: Field sample collection and preparation.
- Exercise 2: Site selection and geomorphic considerations.
- Exercise 3: Equipment/tools and reagents.
- Exercise 4: Field assessment: saline soils with soluble salts and high pH soils.
- Exercise 5: Laboratory sample collection and preparation.
- Exercise 6: Field-Moist preparation and Air-Dry preparation.

Unit-2: Physical Analyses of Soil

30 Hrs.

- Exercise 7: Soil Profile, and Analysis of Soil morphology.
- Exercise 8: Analysis of Soil colour.
- Exercise 9-10: Analysis of soil Structure and Consistence.
- Exercise 11-12: Particle-size distribution analysis.
- Exercise 13: Determine soil textural classes using Hydrometer.
- Exercise 14: Determine soil textural classes using Sieves and shakers.

Unit-3: Chemical Extractions and Analysis of Soil

40 Hrs.

- Exercise 15: Digestion Methods For Elemental Analysis.
- Exercise 16: Digestion Method : Nitric-Perchloric acids.
- Exercise 17: Digestion Method : Nitric- acid.
- Exercise 18: Digestion Method : A mixture of Nitric-hydrochloric acids HNO₃–HCl in a ratio 1:3.
- Exercise 19: Determination of soil pH.
- Exercise 20: Determination of soil Salinity.
- Exercise 21: Soil Salinity analysis using Chlorinity Titration.
- Exercise 22: Measurement of electrical conductivity (EC).
- Exercise 23-24: Determination of Organic matter and Calcium carbonate.
- Exercise 25-26: Determination of sodium, calcium and magnesium.

Unit-4: Analysis of Water Samples

30 Hrs.

- Exercise 27: Determination of pH.
- Exercise 28: Determination of electrical conductivity.
- Exercise 29-30: Determination of turbidity.
- Exercise 31-32: Determination of salinity.
- Exercise 33: Determination of Carbonates
- Exercise 34: Determination of Bicarbonates.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Practical in Tourism Geography

Course Code: MEPR-209 (MSU0325MEP919H3)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. To educate students in map reading for tourism activities.
2. To Make them expertise in tour management
3. To make them expertise in travel management
4. To create awareness about use of computer and internet for tourism and travel business.

Exercise(s):

Unit-1: Map Reading

25 Hrs.

1. Scale of the Map and Measurement of the Distance on Map; Understanding Contour Maps;
2. Map Reading with respect to Transport connectivity (road, rail, air and water) in International Context.
3. Location of Greenwich Mean Time and International Date Line on World Map; Calculation of Time Difference.

Unit-2: Function of Travel and Tour Agencies Collection

35 Hrs.

1. Dissemination of Travel Information,
2. Travel Documentation, Passport, Visa, Ticketing.
3. Preparation of Itineraries, Planning and
4. Costing of Tours,
5. Ticketing,
6. Product Promotion and other Miscellaneous work
7. Types of Tour Itineraries
8. Organizational Structure of a Standard Travel Agency

Unit-3: Functions of Tour Operators

30 Hrs.

9. Assembling, Processing and dissemination of information;
10. Liaisoning with Principals;
11. Preparation of Tour Itineraries and Pricing of Tour Package;
12. Pre-tour-arrangements;
13. Tour Operation and Post-tour Management.
14. Components of Standard Tour Packages.

Unit-4: Computer Application in Tourism

30 Hrs.

15. Ticketing,
16. Hotel booking and other services,
17. Promotion,
18. Websites, and apps.
19. Car hiring.
20. Search of services.
21. Sales promotion.
22. SWOT analysis.

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: On Job Training

Course Code: OJT-210 (MSU0325OJP919H)

Total Credits: 04

Course Outcomes (COs): *Upon successful completion of this course, students will be able to:*

1. *Improve their professional skills related to their employability;*
2. *Effectively manage the assigned workload and complete given task;*
3. *Learn new concept and improve their knowledgebase;*
4. *Do team work and manage on job practical difficulties.*

Duration: One month during summer vacation

Joining Report of On Job Training: Students are expected to join for their on job training with prior intimation to the department. They are expected to carry out work under the guidance of job supervisor.

On Job Training Placement: Student can join any institution/ corporation/ industry as per their choice but within the scope of the subject area.

Total Contact Hours: 120 Hrs.

Note (s):

1. *Students need to submit report of their work in prescribed format.*
2. *Internal assessment while on job training will be done by the job supervisor and need to be forwarded to the Department/ University.*

M.A./M.Sc. Geography (Part I) (Level - 6.0) (Semester II)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Field Project

Course Code: FP-210 (MSU0325FPP919H)

Total Credits: 04

Course Outcomes (COs): *Upon successful completion of this course, students will be able to:*

1. *Carry out field project on their own;*
2. *Formulate project design and methodologies;*
3. *Organize and carry out field visits, collect field data and/or conduct review of literature;*
4. *Effective writing and dissemination of project output having scientific and/or social relevance.*

Duration: One month during summer vacation

Topic: Project topic should be related to finding, reporting and/or disseminating geographical knowledge having scientific and/or social relevance.

Total Contact Hours: 120 Hrs.

Note (s):

1. *Field project is applicable only to those students who are unable to find placement for on job training.*
2. *They have to work under the guidance of a supervisor to carry out the field project.*
3. *Students are expected to carry out field work and use primary data, analyse it and prepare / submit the project report for evaluation.*
4. *They are also expected to make a presentation on the project work details.*

M.A./M.Sc. Geography (Part II) (Level – 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic 2023-24)

Title of Course: Geohydrology and Oceanography

Course Code: MMT-301 (MSU0325MML919I1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know about the development of methods of scientific observation in hydrology and Oceanography;
2. Understand the origin, importance and distribution of water on Earth;
3. Learn about the hydro-geological, coastal and marine processes, landforms and resources;
4. Recognize the role of oceans to deal with the vulnerability of the dynamic earth system;
5. Comprehend about the recent trends in research in Geohydrology and Oceanography;

Unit-1: Groundwater and Basin Hydrology

15 Lectures

Introduction to Geohydrology; Distribution of surface and subsurface water resources on Earth; Hydrological characteristics of aquifers; Groundwater: occurrence, movement and management; Basin hydrology and hydrological cycle: precipitation, evaporation, infiltration and run-off; Hydrograph; Groundwater regimes in India and Maharashtra.

Unit-2: Applied Geohydrology

09 Lectures

Groundwater exploration and water pollution with special reference to India; Problems related to water use; Fresh and salt water relationship in coastal areas; Conservation and planning for the development of water resources; Watersheds and wetlands in India.

Unit-3: Geological Oceanography

14 Lectures

Introduction to Oceanography; Origin and evolution of ocean basins; Topography of the ocean floor: continental shelf, slope, rise, submarine channels, hills, ridges, trenches and abyssal plains; Bottom relief of Pacific, Atlantic and Indian Ocean; Origin and evolution of island arcs; Estuarine & coastal processes and landforms.

Unit-4: Physical, Chemical and Biological Oceanography

22 Lectures

Air-sea interaction and ocean circulation: currents, waves and tides; Currents of Pacific, Atlantic, & Indian Ocean; Properties of oceanic water: chemical composition, salinity, temperature, and density; Major water masses of the World's Ocean; Thermohaline circulation and the oceanic conveyor belt; Biological productivity in the Ocean; Origin and growth of coral reefs; Ocean deposits: origin, type and distribution; Sea level changes; Oceanic regions; Marine resources; Marine pollution.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Fundamentals of Remote Sensing and DIP

Course Code: MMT-302 (MSU0325MML919I2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the principles and concepts of remote sensing and its role in capturing and analyzing Earth's data.
2. Describe the different types of remote sensing platforms, sensors, and image acquisition systems used in the field.
3. Interpret and analyze aerial photographs and satellite images using visual interpretation techniques.
4. Apply digital image processing techniques for feature extraction, including texture, shape, and spectral indices.
5. Explore emerging trends and technologies in remote sensing and digital image processing.

Unit-1: Introduction & Principles of Remote Sensing

20 Lectures

Definition and scope of remote sensing; History and development of remote sensing technology; Electromagnetic radiation (EMR) and electromagnetic spectrum; EMR interaction with atmosphere and earth surface; Atmospheric window and spectral reflectance curve; Resolutions in remote sensing; Types of remote sensing; Principles and applications of optical remote sensing.

Unit-2: Aerial Photography

12 Lectures

Aerial photographs: types, scale, & resolution; Types of aerial cameras and photographic films; Geometry of aerial photographs; Parallax, relief displacement, orthophotos; Elements of visual image interpretation.

Unit-3: Satellite Remote Sensing

14 Lectures

Satellite: types and their characteristics; Types of Sensors; Orbital and sensor characteristics of major earth resource satellites: LANDSAT, SPOT, Sentinel & Quickbird; Recent developments of Indian remote sensing satellite programme.

Unit-4: Digital Image Processing

14 Lectures

Introduction to digital image and image processing; Sources of Errors: Geometric and radiometric; Image rectification; Image classification: supervised and unsupervised.

(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Photogrammetry, Remote Sensing and DIP

Course Code: MMPR-303 (MSU0325MMP919I1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the fundamental principles and concepts of photogrammetry, remote sensing, and digital image processing.
2. Describe the various sensors, platforms, and techniques used in photogrammetry and remote sensing.
3. Apply photogrammetric techniques to extract three-dimensional information from aerial photographs and digital images.
4. Apply digital image processing techniques for enhancing and analyzing remote sensing data.
5. Apply the knowledge of remote sensing and DIP in various thematic studies

Unit-1: Practicals in Photogrammetry

60 Hrs.

Exercise-1: Indexing of aerial photographs.

Exercise-2: Introduction to stereoscopes

2.1: Orientation & construction of 3-D model under Pocket stereoscope

2.2: Stereoscopic Vision test

Exercise-3: Determination of scale

3.1: By establishing relationship between Photo distance and Ground distance

3.2: By establishing relationship between Photo distance and Map distance

3.3: By establishing relationship between Focal length and Flying height

3.4: Determination of Average Scale of Vertical Aerial Photograph

Exercise-4: Relief Displacement

4.1: Calculation of Relief Displacement

Exercise-5: Parallax

5.1: Object height determination from Parallax

Exercise-6: Calculation of Photo Coverage Area with Drone deploy

Exercise-7: Introduction to Photogrammetry software and generation of 3D model

Unit-2: Practicals in Satellite Remote Sensing

20 Hrs.

Exercise-8: Study of satellite image browsing system

8.1: USGS Earth Explorer

8.2: Bhuvan Data Portal

8.3: Copernicus Open Access Hub

Exercise-9: Visual interpretation of satellite images (True Color, FCC and Thermal)

Unit-3: Practicals in DIP

40 Hrs.

Exercise-10: Introduction to DIP software

Exercise-11: Loading of image data, study of histogram and layer information

Exercise-12: Layer stacking and Interpretation of FCC image

Exercise-13: Supervised Classification

Exercise-14: Unsupervised classification Exercise-15: Accuracy assessment

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Statistical Techniques in Geography

Course Code: MMPR-304 (MSU0325MMP919I2)

Total Credits: 02

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the importance and use of statistical techniques in geography
2. Examine relationship between two or more variables with correlation and regression analysis
3. Learn statistical methods and techniques using computer
4. Apply comprehensive knowledge of statistics for analysis of geographical data

Unit-1:

40 Hrs.

Basics of Statistics

- 1: Definitions of statistics and its Importance and use in geography
- 2: Types and sources of statistical data in geography
- 3: Formation of frequency distribution table and its graphical representation using Histogram, Frequency Polygon, O give curve, Cumulative percentage curve

Measures of Statistics

- 4: Measures of central tendency using simple, discrete and continuous data: Mean, Median and Mode.
- 5: Measures of position: Estimation of quartiles, deciles and percentiles.
- 6: Measures of dispersion: Absolute measurements- Mean deviation, Quartile deviation, and Standard deviation.
- 7: Relative measurements: Coefficient of mean deviation, Coefficient of quartile deviation, Coefficient of variations, Index variability and Relative variability.

Unit-2

Analysis of Statistical Relationship

20 Hrs.

- 8: Skewness: Karl Pearson's and Bowley's methods
- 9: Kurtosis
- 10: Correlation analysis: Spearman's rank order correlation and Pearson product moment correlation
- 11: Regression analysis: Simple and Multiple Regression
- 12: Least square method.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Biogeography

Course Code: MET-305 (MSU0325MET919I1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the concepts and historical development of biogeography
2. Get comprehensive knowledge of different classification of animal and plants
3. Know about pattern of biogeography
4. Understand different processes in biogeography
5. Get detail knowledge about influencing factors on biogeography

Unit-1: Concepts in Biogeography

15 Lectures

Nature, scope and significance of Biogeography, History of Biogeography – Plate tectonic and biotic change, Communities, and patterns in biogeography – Biomes, Hotspots, biodiversity, alpha beta diversity and niche.

Unit-2: Influencing Factors

15 Lectures

Influencing factors on life- physical, climatic, and biological. Influence of humans, disturbance factors – physical and biological, changing continents and climates, conservation of biogeography, phytogeography, phylogeography.

Unit-3: Classification of Animals and Plants

15 Lectures

Taxonomical classification of animals and plants, Wallace classification, ecological and geographical, equilibrium theory, neutral theory, species area relationship.

Unit-4: Processes in Biogeography

15 Lectures

Processes – evolution (life of origin theory, evolution theory), dispersal and vicariance, speciation, extinction, invasion, and colonization. Biological interactions – predations, competition, mutualism, parasitism and mimicry.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Geography of Environment

Course Code: MET-306 (MSU0325MET919I2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know about contents and methods of Geography of Environment as an academic and professional discipline.
2. Understand elements of environment and acquire knowledge about biodiversity
3. Get knowledge about natural hazards and management
4. Understand the various environmental issues and policies

Unit-1:

15 Lectures

Concept of environment: Major elements of environment; Functioning of environmental systems: role of biotic and abiotic elements; Biodiversity: meaning, factors influencing biodiversity.

Unit-2:

15 Lectures

Ecosystem (geographic classification) terrestrial and aquatic ecosystems - location, types and characteristics; Energy flow in an ecosystem; food chain, food web and Ecological pyramids; succession; Biogeochemical cycles (carbon, nitrogen and oxygen).

Unit-3:

15 Lectures

Pollution and Environment Degradation, Meaning and concept- environmental degradation and pollution, sources, types, effects and measures of pollution in Air, Water, land, soil. Natural hazards and its impact on environment, Global Warming, International Programmes and Policies (Brundtland Commission, Kyoto Protocol, Agenda 21, Sustainable Development Goals, Paris Agreement).

Unit-4:

15 Lectures

Conservation and management of environment; Concept of sustainable development; Environment impact assessment; Meaning, Importance, needs of EIA, Environmental issues and policies in India, wild life Management, solid waste Management.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Political Geography

Course Code: MET-307 (MSU0325MET919I3)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Identify the geostrategic locations and areal extent of countries in the world
2. Understand the correlation between geography and political actions and processes
3. Get familiar with the electoral system in India
4. Evaluate intrastate and interstate conflicts and disputes of India

Unit-1:

15 Lectures

Definition, nature, scope and significance of Political Geography, Approaches to Political Geography, Elements of Political Geography: Spatial elements-location, size and shape; Economic elements-food, minerals and power resources; Human elements- population, race, caste, religion and language.

Unit-2:

15 Lectures

Concept of state, nation and nation-state, Centripetal and centrifugal forces in state formation, Federalism and other forms of Governance, Frontiers and boundaries, Classification of boundaries, Geopolitics of climate change; world resources and Indian ocean, Role of India in world politics, Geo-strategic views: Mahan, Heartland and Rimland.

Unit-3:

15 Lectures

Citizenship, Geographic influences on voting behaviour, Electoral reforms in India, Electoral system in India. Planning, Execution and Monitoring of Elections with GIS

Unit-4:

15 Lectures

Regional organisations of cooperation (SAARC, ASEAN, OPEC, EU), Geographical determinants of foreign policy, Geopolitical conflicts with reference to India, Reorganization of Indian states, Statehood demands and reorganization possibilities in India, Inter-state conflicts in India, Internal security threats.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester III)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Research Project – I

Course Code: RP-308 (MSU0325RPP919I1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Recognize the objectives and significance of research work;
2. Formulate research design and methods;
3. Organize and carry out field visits, collect field data and/or conduct review of literature;
4. Effective writing, maintaining research ethics and academic integrity;
5. Preparation and dissemination of research output having scientific and/or social relevance.

Unit-1: Research Project:

90 Hrs

Research topic should be related to finding, reporting and/or disseminating geographical knowledge having scientific and/or social relevance.

Unit-2: Study Tour / Geographical Excursion

30 Hrs.

Study tours and visits to places having important geographical features/ landforms and/or social & cultural relevance.

Total Contact Hours: 120 Hrs.

Note (s):

1. Projects will be in batches of students in group.
2. Students are required to select a research topic of geographical importance based on empirical evidences of literature.
3. They are expected to carry out field work and use primary and/or secondary data, analyze it and prepare / submit the dissertation / project report for evaluation.
4. Students are also expected to present / publish the research output.
5. Allotment of guides / supervisor (teaching faculty) will be made at the beginning of the semester III.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Regional Planning and Development

Course Code: MMT-401 (MSU0325MML919J1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Understand the basic concepts in regional planning
2. Understand different methods in order to compute regional development
3. Get acquainted with theories and models for regional development
4. Get a specialized knowledge of policies and experiences of regional planning in India.

Unit-1: Concepts in Regional Planning

15 Lectures

Region-Concept, types and hierarchy of regions - planning- concept and types, Planning region- concept and characteristics of a planning region, Delineation of planning region, Indicators for measuring development, Development- meaning, growth versus development, Measurement of regional development.

Unit-2: Theories and Models for Regional Development

15 Lectures

Theories and models for regional development: spread and backwash concept. Core and periphery concept, Central place theory, Growth pole, Growth foci approach, Ebenezer Howard's Garden City Concept; Green Belt Concept.

Unit-3: Policies and Experiences of Regional Planning

15 Lectures

Policies and experiences of regional planning in India, Institutional framework from national planning level to regional development plans, Tennessee valley authority (USA), Damodar valley corporation (India).

Unit-4: Regional planning in India

15 Lectures

Regional planning in India- rural and urban planning. Regional disparities in India, Planning for tribal area, Hilly area, Command area, and Drought-prone area development. GIS based decision making process, spatial data infrastructure and spatial information system, GIS applications in planning: population estimation, identification of illegal encampments, sources of pollution.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Development of Geographical Thought

Course Code: MMT-402 (MSU0325MML919J2)

Total Credits: 04

Course Outcome (COs): Upon successful completion of this course, students will be able to:

1. Acquire knowledge about the historical development of the subject during different time scales.
2. Apprehend the place of geography in the field of science, social science and natural science.
3. Acquire knowledge about the historical development of the subject during different time scales.
4. Understand all the concepts of philosophy in geography.
5. Recognize different types of dualism and find solutions to terminate them by applying various types of scientific explanations.
6. Become acquainted with the variety of perspectives in Geography.

Unit-1: Field of Geography

10 Lectures

Definition and meaning of Geography; Field of Geography: its place in social and natural science; concepts and philosophy of geography: distributions, relationships, interactions, areal differentiation and spatial organization; Changes in major geographic traditions: Earth science, man-environment relationship, area studies, spatial analysis.

Unit-2: Evolution of Geographical Thought

20 Lectures

Ancient Period: Contributions of Greeks, Romans, Arabs, Chinese and Ancient Indian scholars, Dark age: Medieval period; Impact of Explorations and Discoveries; Modern Geographical Thought - Contributions of: Bernhardus Varenius, Immanuel Kant, Alexander Von Humboldt, Carl Ritter, Schaefer and Richard Hartshorne, William Morris Davis, Ellen Chruchill, Semple and Ellsworth Huntington, Halford J Mackindell, Herbertson. Impact of Darwinian theory on geographical thought.

Unit-3: Dualism in Geography

10 Lectures

Systematic and regional; physical and human; idiographic and nomothetic; qualitative and quantitative; concept of determinism and possibilism.

Unit-4: Scientific Explanations and paradigm shift and perspectives in geography

20 Lectures

Scientific Explanations: routes to scientific explanations (inductive / deductive); types of explanations (cognitive description, cause and effect, temporal); theories, laws and models; quantitative revolution; Perspectives: Positivism, Behaviouralism, Humanism, Structuralism, Feminism, and Post modernism; Recent trends in Geography.

(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Agricultural Geography

Course Code: MET-403 (MSU0325MEL919J1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know about nature, scope and significance of agricultural geography as an academic and professional discipline.
2. Understand the fundamental concept, crop combination, diversification, agricultural productivity and study the determinants of agricultural patterns.
3. Get knowledge about agricultural systems of the world.
4. Understand the agrarian revolution, socio-economic constraints, agricultural problems and policies

Unit-1:

15 Lectures

Definition, nature, scope and significance of agricultural geography; Origin and dispersion of agriculture; Approaches to the study of agricultural geography.

Unit-2:

15 Lectures

Determinants of agricultural patterns-physical, economic and technological; Agricultural systems of the world - location, distribution, types & characteristics of agriculture.

Unit-3:

15 Lectures

Concept & techniques of delimitation of agricultural regions- Crop combination, Crop diversification; Measurement and determinants of agricultural Productivity, Agricultural land use theory- Von Thunen's model of Land Use planning.

Unit-4:

15 Lectures

Agricultural Revolution in India (Green, White) Nature, Socio-economic constraints in the adoption, performance, Problems & prospects. Land use survey, Land classification and land capability, Dry land Agriculture, Food Security, Organic farming. Impact of climate change on agriculture. Agricultural Policies in India.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)

(Introduced from Academic Year 2023-24)

Title of Course: Geography of Resources

Course Code: MET-404 (MSU0325MEL919J2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Establish the relationship between the regional geography and natural resources as a whole.
2. Assess the major natural resources and source regions of the world. .
3. Assess the impact of exploitation on conservation of resources.
4. Understand the qualitative and quantitative aspects of human resource development.
5. Look into the national policy of India on natural resources and human resources.

Unit: 1

15 Lectures

Definition, Nature and Scope, Concept and Classification of Resources. Distribution and Characteristics of Major Natural Resources and source regions of the World: Soils, Forest, Water. Power and Minerals – petroleum, coal, Iron ore, Bauxite, Copper, Tin.

Unit: 2

15 Lectures

Exploitation, uses and conservation of resources: forest, water, soil, fisheries, minerals and energy resources (coal, petroleum), and non –conventional energy resources.

Unit: 3

20 Lectures

Human Resources: Quantitative and Qualitative aspects, population growth, distribution and density pattern, causes of inequalities. Population and resources relationship-carrying capacity of land under different environment.

Unit: 4

10 Lectures

National and global Policies on Natural Resources. Global organizations for sustainable development of resources. Population Policy and Programmes in India.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Social and Cultural Geography

Course Code: MET-405 (MSU0325MEL919J3)

Total Credits: 04

Course outcomes (Cos): Upon successful completion of this course, students will be able to:

1. Study and identify the philosophical base, problems associated with society & its culture.
2. Know about the culture, cultural regions, hearths and their diffusion, realms, and distribution of races.
3. Study and knowing of socio-cultural diversity of India, and processes of social changes.
4. Understand the social justice and well-being of society, to find out the level of well-being in India.

Unit-1: Social Geography

15 Lectures

Conceptual and methodological approaches in Social and Cultural Geography. Definition, scope, and significance of Social and Cultural Geography. Roots of Social Geography and social problem, housing space and society, Spatial Interaction and Social relations, and geography of poverty.

Unit-2: Races and Culture

15 Lectures

Concept of race. Basis of racial classification and their physical characteristics. Races of India. Griffith Taylor and C.S. Coon's Theories of distribution of races of mankind in the world. Concept of culture, culture areas and culture regions, Cultural hearths and their diffusion, World Culture Realms.

Unit-3: Socio-cultural Diversity

15 Lectures

Concept of Dialects and ethnicity. Distribution of Religion, Caste, Tribe, Languages in India. Concept of social areas, North-South Socio-Cultural diversity of India, Processes of Social changes: Modernization, Sanskritization and Globalization.

Unit-4: Social Justice and Well-being

15 Lectures

Concept of social Justice and fair society, Equality and welfare, social development and well-being, Concepts, Components and Indicators of measurement of social wellbeing. Patterns of social wellbeing in world and India. Women empowerment, Social status of women in India.

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Data Representation Methods: Physical Geography

Course Code: MEPR-406 (MSU0325MEP919J1)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know the methods of representation of relief.
2. Understand the topographical maps.
3. Identify and map relief features.
4. Analyse drainage basin morphometry.
5. Understand the formats of Indian daily weather report and reading of weather signs and symbols
6. Represent meteorological elements diagrammatically and interpretation of results.
7. Know methods of measurement of meteorological elements
8. Analyse interrelationship between various meteorological elements
9. Analyse present and future trends of meteorological elements.

Unit-1: Relief Representation and Mapping of Landforms

30 Hrs.

Practical Exercise(s):

- 1-3: Relief representation method: Pictorial and Mathematical.
- 4-5: Map: Definition and types.
- 6: Indexing of Topographical sheets.
- 7-9: Identification and Mapping of Landforms from Topographical Maps: Ridge, Saddle, Col., Pass, Spur, Plateau, Escarpment, Cliff, Waterfall, River Terraces, 'U' shaped Valley, 'V' shaped Valley.

Unit-2: Drainage Basin Analysis

30 Hrs.

Practical Exercise(s):

- 10-12: Quantitative Analysis of Channel Planform: Sinuosity Index of Straight, Sinuous and meandering channel.
- 13: Drainage Basin Morphometry.
- 14-15: Calculation of Bifurcation Ratio, Drainage Density and Stream Frequency.
- 16-17: Analysis of Cross Profiles & Longitudinal Profile of River; projected, superimposed and composite profile.

Unit-3: Diagrammatic Depiction of Meteorological Elements

30 Hrs.

Practical Exercise(s):

- 18: Weather details: Weather Signs & symbols
- 19-21: Reading and interpretation of weather maps of representative seasons.
- 22: Interpolation of Isopleth
- 23-25: Depiction and Interpretation of Comfort diagrams- Climograph, Hythergraph, Climatograph

Unit-4: Analysis of Interrelationship: Meteorological Elements

30 Hrs.

Practical Exercise(s):

- 26: Spatial correlation of climatic variables: Graphical analysis
- 27: Water budget: Graphical analysis
- 28: Analysis of upper air data- Tephigram (Temperature Height diagram)

29: Ergographs (Crop Calendar)

30-31: Dispersion graphs: Temperature and rainfall dispersion Diagram

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Data Representation Methods – Human Geography

Course Code: MEPR-407 (MSU0325MEP919J2)

Total Credits: 04

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. Know basic cartographic techniques of human geography
2. Make graphical representation of geographical data
3. Analyse demographic, social, economic, agricultural and industrial data
4. Prepare suitable maps and diagrams for effective visual representation

Practical Exercise(s):

Unit-1: **30 Hrs.**

1-2: Measures of population growth (absolute, arithmetic and exponential).

3-6: Graphical representation of population distribution and composition of age, sex, rural-urban and occupational structure.

7-9: Calculation and representation of fertility (crude birth rate, general fertility rate); mortality (crude death rate, infant mortality rate) and literacy rate (crude literacy rate, specific literacy rate).

Unit-2: **30 Hrs.**

10: Computation of human development index.

11-13: Calculation and representation of health, social and economic wellbeing indicators.

14-15: Calculation and representation of wealth inequality: Lorenz curve and Gini Co-efficient.

16-17: Measurement of agricultural efficiency and intensity; methods of delineating crop combination regions (Weaver, Doi, Raifulla method).

18: Calculation of food security index (composite method of availability & accessibility).

Unit-3: **30 Hrs.**

19-20: Analysis of industrial intensity: location quotient, index of similarity, location co-efficient, location curve.

21: Measurement of industrial development.

22-24: Road accessibility matrix, gravity model showing transport interaction, traffic flow analysis.

Unit-4: **30 Hrs.**

25: Nearest Neighbor Analysis.

26: Density functions and pattern analysis of distribution of settlement (randomness and spacing indices).

27-28: Breaking point analysis (Losch), measures of centrality (Christaller), connectivity (Pitts).

29: Rank size distribution of towns (Zipf and Berry-Garrison).

30: Functional classification of towns (Harris and Nelson).

M.A./M.Sc. Geography (Part II) (Level - 6.5) (Semester IV)
(NEP – 2020)
(Introduced from Academic Year 2023-24)

Title of Course: Research Project – II (Dissertation)

Course Code: RP-408 (MSU0325RPP919J1)

Total Credits: 06

Course Outcomes (COs): Upon successful completion of this course, students will be able to:

1. *Recognize the objectives and significance of research work;*
2. *Formulate research design and methods;*
3. *Organize and carry out field visits, collect field data and/or conduct review of literature;*
4. *Effective writing, maintaining research ethics and academic integrity;*
5. *Preparation and dissemination of research output having scientific and/or social relevance.*

Topic: Research topic should be related to finding, reporting and/or disseminating geographical knowledge having scientific and/or social relevance.

Total Contact Hours: 180 Hrs.

Note (s):

1. *Research topic and work for Research Project- II (Dissertation) preferably should be different for each student.*
2. *Students are required to select a research topic of geographical importance based on empirical evidences of literature.*
3. *They are expected to carry out field work and use primary and/or secondary data, analyze it and prepare / submit the dissertation / project report for evaluation.*
4. *Students are also expected to present / publish the research output.*
5. *Allotment of guides / supervisor (teaching faculty) will be made at the end of the semester III.*

9. Scheme of Teaching: Scheme of teaching and time table for lectures, tutorials and practicals will be notified before start of every semester.

10. Examination Pattern and Requirement before appearance for University Assessment:

Course Type	University Assessment Marks (pl. check scheme of marking)	Internal Assessment Marks (Class Test + Seminar/ Assignment)	During University Assessment				Supervisor's Report (for Internal Marks)
			Seminar Presentation	Assignment /Journal	Project Reports	Study Tour Report	
Theory	80	20	Required	--	--	--	--
Practical – 4 Credits	100	Nil	--	Required	--	--	--
Practical – 2 Credits	50	Nil	--	Required	--	--	--
Field Project / On Job Training – 4 Credits	60	40	Required	--	Required	--	40
Research Project – 4 Credits	80	20	Required	--	Required	Required	20
Research Project – 6 Credits	120	30	Required	--	Required	--	30

11. Nature of Question Paper and Scheme of Marking for University Assessment:

I. Nature of Theory Question Paper (80 Marks):

Question No.	Type of Question (Word limit)	Number of Questions to be Asked	Number of Questions to be Answered	Marks per Question	Total Marks
Q1.	Objective type (MCQ)	08	08	02	16
Q2.	Short Answer	04	04	04	16
Q3.	Short Notes	03	02	08	16
Q4.	Long Answer/ Essay type	02	01	16	16
Q5.	Long Answer/ Essay type	02	01	16	16
Total = 05	--	--	--	--	80

II(a). Nature of Practical Question Paper for Major Practical (100 Marks) Assessment:

Question No.	Type of Question/ Assessment	Marks
Q1	Practical/ Lab Assessment	20
Q2	Practical/ Lab Assessment	20
Q3	Practical/ Lab Assessment	20
Q4.	Practical/ Lab Assessment	15
Q5.	Practical Assignment/ Journal	15
Q6.	Viva-voce	10
Total = 06	--	100

II(b). Nature of Practical Question Paper for Minor Practical (50 Marks) Assessment

Question No.	Type of Question/ Assessment	Marks
Q1.	Practical/ Lab Assessment	20
Q2.	Practical/ Lab Assessment	15
Q3.	Practical Assignment/ Journal	8
Q4.	Viva-voce	7
Total = 04	--	50

III. Scheme of Examination for Field Project / Job Training (60 Marks)

Question No.	Type of Question/ Assessment	Marks
Q1.	Seminar Presentation	20
Q2.	Evaluation of Project Report/ Job Report	20
Q3.	Viva-voce	20
Total = 03	--	60

IV(a). Scheme of Examination for Research Project –I (80 Marks)

Question No.	Type of Question/ Assessment	Marks
Q1.	Seminar Presentation	20
Q2.	Evaluation of Project Report	25
Q3.	Evaluation of Study Tour Report	15
Q4.	Viva-voce	20
Total = 04	--	80

IV(b). Scheme of Examination for Research Project –II / Dissertation (120 Marks)

Question No.	Type of Question/ Assessment	Marks
Q1.	Seminar Presentation	30
Q2.	Evaluation of Project Report	60
Q3.	Viva-voce	30
Total = 03	--	120

*Nature of question paper may be different than specified here in case of online assessment.

12. Equivalence of Courses

M.A./M. Sc. Geography Part I & Part II (Semester I, II, III, and IV)

Old Course			Equivalent Course		
Course No.	Course Title	Credits	Course No.	Course Title	Credits
